

How to use:

Test:

1. Click 'New Polygon' to draw a new polygon with selected sides (3 by default)
2. Type in matrix that you want to apply to the selected shape, click transform, shape will transform according to the input matrix
3. Click 'Store' if you want to store current matrix in stack
4. Click 'Reset' to reset the input matrix
5. Click the spin box to see what has been saved in stack. You can apply it, or add it to Transformation List.
6. Click 'Transform' to transform the whole list, or click 'Clear' to clear list.
7. Select a color you want to apply to the selected shape and click 'Change Color'
8. Click 'Quit' to exit
